The screenshot shows a Postman interface for a REST client. The top bar indicates a POST method to the URL `http://localhost:8000/api/auth/login`. Below the address bar are tabs for Params, Authorization, Headers (10), Body, Pre-request Script, Tests, and Settings. Under the Body tab, several format options are shown: none, form-data, x-www-form-urlencoded, raw (selected), binary, GraphQL, and JSON. A single line of code is entered in the body field:

```
{ "username": "admin", "password": "admin" }
```

postman『method post』-token 填入Authorization
